**RE: Non-Provisional Patent
Appl. #10/758,918
Filing Date 01/14/2004***
RESPONSE TO OFFICE
COMM. - DATED 02/01/2006**

Dear Mr. Edell:

This is in response to your office communication dated February 1, 2006. Enclosed are the claims with changes you requested.

In response to your rejection of Claims 1 - 10, I have included a separate Claims Listing and made the corrections you have indicated by striking them out with a line if they are to be deleted and underlined if they are to be added. I have used double brackets where needed and I have used the proper identifier in a parenthetical expression (Currently amended) next to each claim amended. It is my hope that this amendment to claims now complies with the requirements of 37 CFR 1.121 (c).

On a separate remarks page I have indicated that I have not made any amendments to the original specification and that the original specification that was filed is what is intended to be the specification submitted.

I hope that all of your objections and requests have been fully satisfied and I thank you for your patience.

Respectfully submitted,

Barbara J. Bury
